SARUKHAN MUTHURAMAN

7092978110 | s.saru7072@gmail.com | Bangalore, Karnataka, India | Portfolio | Immediate Joiner

PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of software development experience building responsive Web3 and FinTech applications with React.js, Next.js, TypeScript, JavaScript, and Tailwind CSS. Experienced in reusable component architecture, REST API integration, wallet connectivity, blockchain interactions, mobile-responsive trading workflows, and cross-functional Agile delivery. Brings working knowledge of Java, Spring Boot, and MySQL from fintech development, with ongoing learning in AI-assisted application workflows and integration. Available to join immediately.

TECHNICAL SKILLS

- Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, Tailwind CSS, Responsive Web Design, Framer Motion
- API & Backend: REST APIs, API Development and Integration, Java, Spring Boot (working knowledge), Angular, AngularJS
- Web3: Wallet Integration, Blockchain Interactions, Solana, Decentralized Applications (DApps), Web3 User Flows
- Databases: MongoDB, MySQL, PostgreSQL
- Engineering: Reusable Components, Responsive Interfaces, Performance Optimization, Debugging, Integration Testing, Git, Agile/Scrum, SDLC, Deployment and Maintenance
- AI Learning: AI-assisted Development, AI Output/Task Evaluation, AI Feature Exploration, CRM Workflow Prototyping, API-based AI Integration (learning)

PROFESSIONAL EXPERIENCE

Developer | Tradala Trade Solutions (Xyra Labs) | Apr 2025 - Oct 2026

• Develop responsive Web3 application features using React.js, Next.js, TypeScript, and MongoDB for gaming, lottery, and trading workflows.
• Build reusable UI components and integrate backend APIs to keep data-driven interfaces consistent, maintainable, and usable across desktop, tablet, and mobile screens.
• Integrate wallet connectivity and blockchain interactions; work with backend and blockchain teammates to investigate integration issues and validate user flows.
• Adapt complex desktop trading journeys for mobile devices, refine responsive behavior, and apply component-level rendering improvements where appropriate.
• Coordinate with product, design, engineering, and QA teammates to clarify requirements, reproduce defects, verify fixes, and support production releases.

Developer | Rocket Finance | Feb 2023 - Apr 2024

• Developed and maintained RESTful APIs using Java Spring Boot and MySQL for peer-to-peer lending, digital banking, customer management, and loan-processing workflows.
• Customized Mifos X banking modules to align customer, loan, administrative, and financial workflows with business requirements.
• Integrated backend services with Angular/AngularJS interfaces and traced issues across UI, API, and database layers to support reliable end-to-end flows.
• Updated MySQL schemas and queries, supported data validation, and contributed to debugging, integration testing, code reviews, and production support.
• Worked with product owners, business analysts, frontend/backend developers, and QA teammates to clarify requirements and deliver changes in an Agile workflow.

Incubation Trainee | Zoho | 2022 | 1.5 months

• Completed assigned Java and C++ programming tasks, applying core programming and object-oriented programming concepts to defined requirements.

• Debugged task solutions and applied foundational data-structure, algorithm, and problem-solving techniques; to meet the assigned task requirements.

PROJECTS

1. Kaching - Web3 Lottery Platform | Production project
Tech: Next.js, React.js, Tailwind CSS, MongoDB, Solana, Framer Motion
• Developed responsive interfaces for lottery participation and account workflows, using reusable React components to support consistent behavior across screens.
• Integrated backend APIs with Solana wallet connectivity, coordinated with product/design teammates on user flows, and supported UI validation, cross-browser checks, and release fixes.
Project: kaching.vip

2. Perps, Swap and Mobile Trading Interfaces | Web3 trading
Tech: Next.js, React.js, Tailwind CSS, Web3, APIs, TradingView
• Built responsive trading and token-swap interfaces and adapted complex desktop trading workflows into mobile-friendly user journeys.
• Created reusable trading UI components and integrated API-driven data; collaborated with backend/blockchain and QA teammates to troubleshoot wallet, chart, and responsive-interface issues.
• Contributed to TradingView plugin enhancements and a points leaderboard, including interactive chart elements, ranking tables, and dynamic data presentation.

3. Rocket Finance - Digital Lending and Mifos X | FinTech
Tech: Java, Spring Boot, Angular/AngularJS, MySQL, REST APIs, Mifos X
• Implemented and maintained API and database changes supporting customer management, loan processing, authentication, and financial operations.
• Customized Mifos X administrative modules and coordinated frontend/backend integration, debugging, testing, and production-support activities with the wider team.

4. AI-Assisted CRM Suite, Landing Pages and Portfolio | Independent projects
Tech: Next.js, TypeScript, PostgreSQL/Supabase, REST APIs, Email Workflows
• Developing three CRM concepts: OutReach CRM, Contact CRM, and Restaurant CRM, focused on lead/contact organization, customer engagement, outreach templates, follow-ups, and activity tracking.
• Prototyping CRM dashboards, pipeline workflows, and analytics; learning and testing AI-assisted tasks, AI output quality, and practical ways to integrate AI capabilities into existing application workflows. AI features remain in development/exploration.
• Designed and developed 5-6 landing pages plus a personal developer portfolio, translating project requirements into responsive, production-oriented web pages.
• Implemented reusable components, motion effects, mobile layouts, and SEO-focused page structure; tested responsive behavior and supported deployment and post-launch refinements.
Portfolio: portfolio-weld-mu-dw8u3j4h6w.vercel.app

EDUCATION

- B.Tech in Information Technology
  - PSNA College of Engineering and Technology | Jun 2018 - May 2022 | 72%
- Higher Secondary Certificate (HSC)
  - MNU Jayaraj Nadar Higher Secondary School | Jun 2017 - Apr 2018 | 71%

INTERESTS AND CONTINUOUS LEARNING

Learning emerging technologies and AI tools; building AI-assisted landing-page and CRM prototypes; testing AI-generated outputs and tasks; exploring ways to integrate AI features into existing applications.
