Frontend Developer with 2+ years of experience creating responsive and user-friendly web applications. Skilled in React.js, Next.js, Tailwind CSS, Web3 technologies, API integration, and API development, with a good understanding of backend systems. I enjoy building intuitive digital experiences, solving real-world problems, and learning new technologies. Looking for an opportunity to contribute my skills, take on new challenges, and grow as a developer.

Work Experience

Developer

APR 2025 – PRESENT

Tradala Trade Solutions (Xyra Labs)

- Developed and maintained Web3-based applications using React.js, Next.js, and MongoDB.
- Contributed to the development of a blockchain-powered gaming platform, implementing user-facing features and integrating Web3 functionalities.
- Designed and developed reusable, responsive UI components to ensure a consistent user experience across the application.
- Collaborated with designers and product teams to convert wireframes and design concepts into high-quality, production-ready interfaces.
- Built and integrated backend APIs to support gaming and blockchain-related functionalities.
- Worked on wallet connectivity, blockchain interactions, and Web3 integrations to enable decentralized application features.
- Participated in application architecture discussions and implemented scalable frontend and backend solutions.
- Improved application responsiveness and optimized performance across desktop, tablet, and mobile devices.
- Played a key role in transforming web-only experiences into fully responsive, mobile-friendly applications.
- Integrated frontend components with backend services and databases, ensuring secure and efficient data flow.
- Worked closely with QA and development teams to troubleshoot issues, enhance functionality, and deliver production-ready releases.
- Contributed throughout the complete software development lifecycle, including requirement analysis, development, testing, deployment, and maintenance.

Developer

FEB 2023 – APR 2024

Rocket Finance

- Developed and maintained full-stack applications using Java Spring Boot, Angular/AngularJS, and MySQL.
- Designed, developed, and enhanced RESTful APIs to support business and banking operations.
- Integrated frontend applications with backend services, ensuring seamless data flow and user experience.
- Worked extensively on the open-source Mifos X banking platform, customizing modules and features based on business requirements.
- Redesigned and enhanced user interfaces to improve usability, accessibility, and overall user experience.
- Developed new functionalities and modified existing modules related to customer management, loan processing, and financial operations.
- Participated in database design, schema creation, query optimization, and performance tuning using MySQL.
- Collaborated with product owners, business analysts, and QA teams to gather requirements and deliver scalable solutions.
- Performed bug fixing, testing, code reviews, and production support to ensure application stability and reliability.
- Contributed to the development of fintech solutions, including Peer-to-Peer (P2P) lending and digital banking systems.

ZOHO

- Completed intensive training in Java programming, object-oriented design principles, and software development fundamentals.
- Developed programming solutions and mini-projects using Java and C++.
- Strengthened problem-solving skills through hands-on implementation of data structures and algorithms.
- Gained practical experience with debugging, code optimization, exception handling, collections, and file processing.
- Participated in coding assessments and collaborative learning activities to improve software engineering practices.

Projects

1. Kaching – Web3 Lottery Platform

Tech Stack: Next.js, MongoDB, Tailwind CSS, Motion, Solana Blockchain

- Developed responsive and interactive user interfaces using Next.js and Tailwind CSS.
- Built reusable UI component architecture to improve development efficiency and maintainability.
- Implemented smooth animations and transitions using Framer Motion to enhance user engagement.
- Integrated frontend functionalities with backend APIs supporting lottery game operations.
- Collaborated with Solana blockchain integrations for wallet connectivity and lottery participation workflows.
- Optimized application performance through component-level rendering improvements and lazy loading techniques.
- Ensured cross-browser compatibility and seamless user experience across desktop and mobile devices.
- Participated in UI/UX discussions and implemented design improvements based on user requirements.
- Enhanced accessibility and responsiveness following modern frontend best practices.
- Contributed to production deployments, testing, and bug-fixing activities.

Project link: [_kaching.vip](https://kaching.vip)

2. Perps Mobile Version – Perpetual Trading Platform

Tech Stack : Frontend & backend – Next JS, Mongo DB, Web3

- Developed the complete mobile-responsive version of the perpetual trading platform from scratch.
- Converted complex desktop trading workflows into intuitive mobile experiences.
- Built responsive trading interfaces optimized for various screen sizes and devices.
- Integrated and adapted existing APIs to support mobile trading functionalities.
- Implemented advanced animations, transitions, and gesture-friendly interactions.
- Improved mobile performance through code optimization and efficient component rendering.
- Worked closely with designers and product teams to maintain design consistency.
- Enhanced trading usability by simplifying navigation and mobile-specific interactions.
- Ensured seamless wallet integration and blockchain-related user flows on mobile devices.
- Conducted extensive testing across Android and iOS browsers for compatibility.

3. Rocket Finance – P2P Loan Application

Tech Stack: Angular, Java Spring Boot, MySQL

- Developed and maintained backend APIs for a peer-to-peer lending platform.
- Designed and optimized database schemas to improve data consistency and performance.
- Implemented business logic for loan processing, user management, and financial workflows.
- Participated in application architecture discussions and technical planning sessions.
- Collaborated with frontend developers to integrate APIs and improve user experience.
- Assisted in deployment activities and environment configuration across development stages.
- Performed debugging, issue resolution, and performance optimization.
- Worked within Agile development processes, participating in sprint planning and code reviews.
- Contributed to application scalability, security, and maintainability improvements.
- Assisted in implementing authentication and authorization-related functionalities.

4. Mifos Admin Tool

Tech Stack: AngularJS, Java Spring Boot, My sql

- Customized Mifos administrative modules to support Rocket Finance business requirements.
- Worked on both frontend and backend development tasks across multiple modules.
- Analyzed existing platform architecture and workflows to identify customization opportunities.
- Modified UI components, forms, dashboards, and administrative workflows.
- Developed backend enhancements supporting custom business processes.
- Integrated admin functionalities with Rocket Finance mobile applications.
- Fixed bugs, optimized workflows, and improved overall system usability.
- Participated in requirement gathering and technical solution discussions.
- Ensured seamless data synchronization between administrative and operational systems.
- Enhanced reporting and management features for internal users.

6. Points Leaderboard

Tech Stack: Next.js, PostgreSQL

- Developed a real-time leaderboard system for ranking platform users.
- Built responsive ranking tables, profile displays, and points tracking interfaces.
- Integrated APIs to fetch and display dynamic leaderboard data.
- Implemented sorting, filtering, and ranking functionalities.
- Enhanced user engagement through visually appealing leaderboard experiences.
- Optimized data rendering for large user datasets.
- Ensured seamless integration within the existing Perps ecosystem.
- Improved UI responsiveness and loading performance.
- Supported future scalability through reusable component architecture.
- Participated in testing and deployment activities.
